

Building the most advanced
wireline equipment in the world

The Ultimate Quick Rig (QR 550)

Precise control in a small package

Quick and Easy

Delve International, Inc. designs and manufactures wireline trucks, quick rigs and skids for open hole, cased hole, surveying and slickline applications. Our experienced engineers and designs use state of the art software to provide a balance between functionality, life cycle, and cost. Delve specializes in building to your specifications. We offer personalized service from a team of highly trained engineers and technicians who pride themselves in providing a clean functional and trouble free product. We provide quick turn around and support during and long after the sale. Let us earn

The Ultimate Quick Rig (QR 550)

Benefit:

- The ultimate control in a small package
- Setup and operation is simple
- Environmentally controlled work area
- Open Loop and Closed Loop Draw Work systems
- Options to meet your needs
- Go where the big rigs can't
- Slickline wire, Braided line, multi-conductor line capabilities
- Good visibility
- Excellent speed control

- Maneuverability—The Quick Rig can be maneuvered in tight spaces. With 4 wheel drive as an option, The Quick Rig can be taken places that are difficult for a big truck
- Setup — is quick and easy.

SPECIFICATIONS:

Truck weight under	17,000 lbs
Drawworks module under	2,000 lbs
Power 220 VAC/12 VDC	3000kw
Line speed Max up to	1000ft/min
Line speed Min as low as	10 ft/min
.092 Line capacity	25,000 ft
3/16 line capacity	25,000 ft
7/32 Line capacity	20,000 ft
Minimum chassis size	Class 5

- Operation— with a state-of-the-art electro-hydraulic system you get the smooth operation of hydraulics, back lash free and the control of electronics with out the heat or noise.

Features and Options

- Compact and lightweight
- Power Inverter up to 3kw
- Air Compressor
- Counter Space
- Computer Printer
- Gyro storage
- Measuring head
- Lighting
- Satellite internet connection
- Long range cell phone
- Adjustable operation chair
- Remote electronic joysticks
- Digital displays
- Rear enclosure\Auto feed on steering or manually operated
- Computer interface

Models:

You can design your Quick Rig with all the bells and whistles. Like internet, air, enclosed control center, Digital displays, 3kw 120 VAC or 220 VAC Power and more.

Or you can choose the basic work horse, solid and reliable.
